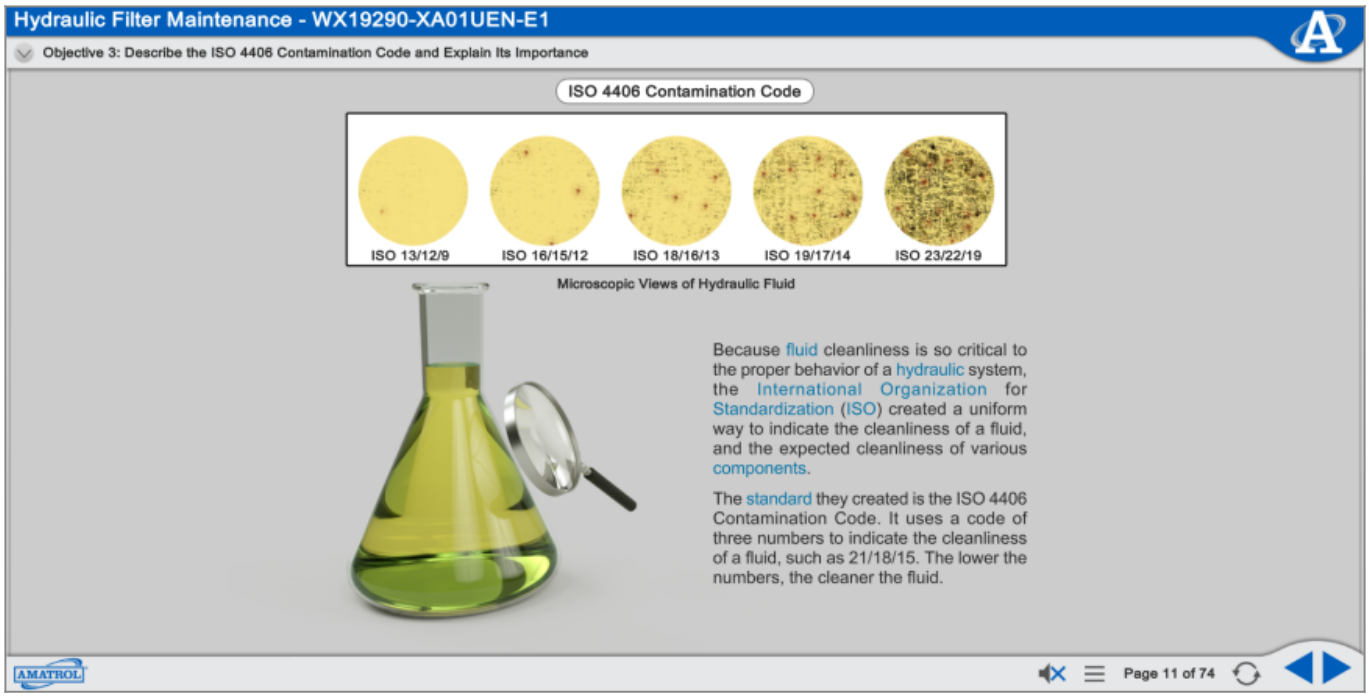
Hydraulic Maintenance | eLearning Course



eLearning Course: M19290

Hydraulic power is used in everything from automotive brakes to industrial robots. Amatrol's Multimedia Courseware – Hydraulic Maintenance (M19126) provides a valuable learning experience for industrial maintenance technicians, system installers, and many others by covering hydraulic filter and fluid maintenance, fittings, seals, hydraulic hose and clamping devices, hydraulic tubing, and hydraulic component installation..

Teach Intermediate Hydraulics

Amatrol's eLearning curriculum uniquely, and thoughtfully combines in-depth theoretical knowledge with practical, hands-on skills. This powerful combination of knowledge and skills solidifies understanding and creates a strong foundation for pursuing more advanced skills.

Master Hydraulic Maintenance Skills
Amatrol's Hydraulic Maintenance eLearning M19126 allows learners to gain skills through realistic simulation before using the real equipment. The combination of theoretical knowledge and hands-on skills solidifies understanding and creates a strong basis for pursuing more advanced skills.

Engaging, Highly-Interactive Multimedia
Amatrol's curriculum features a highly-interactive, multimedia format that includes stunning 3D graphics and videos, voiceovers of all text, and interactive quizzes and exercises designed to appeal to learners with different learning styles. The 850-HD1 curriculum teaches learners about basic hydraulic concepts, such as circuit connections, basic motor circuits, fluid friction, meter-in and meter-out circuits, pressure reducing valves, schematics, pressure and volume, and flow control valves.

The curriculum also features a virtual trainer option that allows learners to gain skills through realistic simulation before using the real equipment. The combination of theoretical knowledge and hands-on skills solidifies understanding and creates a strong basis for pursuing more advanced skills.
