

Hydraulic Troubleshooting eBook| Unmatched Hydraulic Training

eBook: EB544

Amatrol's Hydraulic Troubleshooting eBook and eLearning course covers pressure-compensated pump performance, and troubleshooting hydraulic pumps, actuators and systems. This course also covers troubleshooting the following kinds of valves: directional control, flow control, check, pressure control, unloader, and counterbalance. (References [950-HT1](#))

Teach Hydraulic Troubleshooting

Hands-On Hydraulic Troubleshooting eBook Introduces Learners to Industrial World

This learning system explores hydraulic system troubleshooting and advanced hydraulic systems operation. To develop troubleshooting skills, this curriculum will first discuss how to test for failures in each type of hydraulic component while the component is still attached to the system. Later, the learning system will explain methodical troubleshooting procedures that will help apply these tests in an efficient manner to locate the problem as quickly as possible.

The advanced hydraulic training course will introduce a number of new types and styles of hydraulic components and systems not seen in previous Amatrol courses, but which are quite common in industry. These include subplate-mounted pressure control valves, sandwich valves, JIC cylinders with cushions, pressure-compensated pumps, tandem pumps, unloader valves, and counterbalance valves. This hydraulic eBook has also been keyed to the Amatrol 950-HT1 Hydraulic Troubleshooting System. This trainer uses the new styles of components and has faults that can be inserted by the student or the instructor to provide a realistic industrial troubleshooting practice.

Amatrol's eBook Allows Students 24/7 Online Access to Curriculum

Amatrol's eBooks look like a real book and allow users to flip between pages with ease. Enhanced with features such as keyword searches and zoom controls that enable a user to quickly locate and view information, these eBooks are a fantastic learning tool. Amatrol's eBooks are available online and can be used by anyone with access to Amatrol's Learning Management System (LMS). Optionally, if you choose to use your own LMS, these eBooks are SCORM compatible to allow smooth integration into your current training system. Combined with our already

extensive library of interactive multimedia titles, which are also SCORM compatible, users can now complete their entire course work online!
