

Industrial Piping Systems Training| eBook Curriculum

eBook: EB526

Amatrol's Piping Systems eBook curriculum (EB526) teaches how to layout and assemble fluid piping systems used in industrial, construction, agricultural, and transportation applications. Students will learn how to select, size, identify, and install a variety of types of industrial fluid piping, fittings, and valves.

Teach Piping System Fabrication

What is the Function of a Piping System?

The function of a piping system is to carry liquids or gases from one location to another. A typical piping system can be found in the natural gas distribution system used in a manufacturing facility. In this piping system, gas is distributed through steel pipes from the meter gas, to gas space heaters located throughout the facility.

Industrial Piping Systems eBook Allows Online Access to Curriculum

Amatrol's eBooks look like a real book and allow users to flip between pages with ease. Enhanced with features such as keyword searches and zoom controls that enable a user to quickly locate and view information, these eBooks are a fantastic learning tool. Amatrol's eBooks are available online and can be used by anyone with access to Amatrol's Learning Management System (LMS). Optionally, if you choose to use your own LMS, these eBooks are SCORM compatible to allow smooth integration into your current training system. Combined with our already extensive library of interactive multimedia titles, which are also SCORM compatible, users can now complete their entire course work online!
