

Overhead Crane Safety| Interactive eLearning

eLearning Course: MXSA206

Amatrol's Overhead Crane Safety eLearning Course (MXSA206) covers major topics including crane components and operation and OSHA safety standards. This Overhead Crane Safety online training course allows learners to study objectives like identifying unsafe conditions for using cranes, overhead crane safety checks, and OSHA standards for crane operation.

Teach Workplace Safety Skills

Crane Components

This segment discusses hoist motor components, the basic requirements for crane operators, overhead crane control pendant operation, and the major components of an overhead crane and overhead crane lifting device.

Crane Inspection

Within this segment, learners study daily visual inspections of an overhead crane and how to inspect an overhead crane system's hoist, bridge, and lifting device.

Crane Safety

This segment covers overhead crane operation safety rules and hand signals, how to safely move a load using an overhead crane, and how to safely lower and remove a load from an overhead crane.

Interactive Multimedia

Highly-Interactive Multimedia Format Appeals to All Learning Styles

Amatrol's Safety eLearning course curriculum features a highly-interactive multimedia format. Stunning 3D animations, videos, pictures, voiceovers of all text, and interactive quizzes and exercises bring learning to life. Amatrol's multimedia curriculum contains elements that will appeal to every learning style, keeping learners motivated and engaged.
