Accident Response - WXSA106-XX01XEN-E2

Objective 5: Describe How to Apply Basic First Aid Measures

Treatment Measures for Workplace Accidents

First aid measures will vary depending on the situation.

To remain current on the latest information, first aid responders should go through refresher training on first aid and other emergency procedures every year.

The following measures are for more common workplace accidents:

- Shock
- Bleeding
- Chemical Ingestion
- Burns
- Electrical Shock

eLearning Course: MXSA106

Amatrol's Accident Response eLearning (MXSA106) covers major topics including workplace first aid and accident procedures. This Workplace Accident Response online training course allows learners to study objectives like preventing bloodborne pathogen exposure, using an eyewash station, and reporting a workplace accident.

Teach Workplace Safety Skills

Amatrol's Accident Response eLearning curriculum is unique in that it thoughtfully combines in-depth theoretical knowledge with practical, hands-on skills. This powerful combination of knowledge and skills solidifies understanding and creates a strong foundation for pursuing more advanced skills.

For example, the basic electrical eLearning course covers important topics, such as:

First Aid

This segment explains what bloodborne pathogens are and how to prevent exposure to them, as well as the guidelines for applying first aid.

Accident Procedures

Within this segment, learners will study how to respond to a workplace accidents, how to use an eyewash station, and how to report a workplace accident.

Interactive Multimedia

Highly-Interactive Multimedia Format Appeals to All Learning Styles

Amatrol's Safety eLearning course curriculum features a highly-interactive multimedia format. Stunning 3D animations, videos, pictures, voiceovers of all text, and interactive quizzes and exercises bring learning to life. Amatrol's multimedia curriculum contains elements that will appeal to every learning style, keeping learners motivated and engaged.
