Wound Rotor Motor Training | eLearning Course

eLearning Course: MB877

Amatrol's Multimedia Courseware – Wound Rotor Motor (MB877) teaches learners essential wound rotor motor concepts applicable throughout modern industry. Wound rotor motors are used in a wide variety of industrial, commercial, and residential applications. Learners using Amatrol's wound rotor motor eLearning course begin by studying the basic principles of wound rotor motors. From this building block, learners begin practicing industry-relevant skills, like speed control and reversing a wound rotor motor.

In-Depth Wound Rotor Motor Curriculum

Comprehensive Wound Rotor Motor Curriculum Connected to Real-World Skills Amatrol's wound rotor motor eLearning course covers important topics, such as:

Wound Rotor Motor Speed Control

Learners begin with an introduction to wound rotor motors, including their function and operation. Individual lessons focus on topics like advantages of wound rotor motors and speed control. Learners will also practice skills, such as connecting and operating a wound rotor motor and connecting and operating a wound rotor speed controller.

Wound Rotor Motor Performance Characteristics

Learners will study wound rotor motor performance characteristics. Individual lessons focus on topics like torque and speed. Learners will also practice skills, such as measuring wound rotor motor performance characteristics and reversing the rotation of a wound rotor motor.

Interactive eLearning with Learning Management System

Highly-Interactive Multimedia Format Appeals to All Learning Styles

Amatrol's wound rotor motor eLearning course features interactive eLearning curriculum that integrates various types of learning methods to create an engaging, effective learning experience. Amatrol's multimedia <u>eLearning</u>

curriculum includes text with voiceovers, videos, 3D animations, pictures, and interactive activities, quizzes, and self-reviews.

Free Learning Management System (LMS)

Amatrol eLearning is easy-to-use for both students and instructors. Its web-based interface is simple to navigate and available on any WebGL-compatible Internet browser. Instructors love Amatrol eLearning for its simple, yet sophisticated Learning Management System (LMS). The LMS allows instructors to create custom courses, monitor student participation, track course progress, assess knowledge levels prior to a course, and test knowledge levels after completion. Learners appreciate the fact that they can start and stop as needed, moving through each Amatrol course at their own pace. If a self-review reveals that they didn't understand a particular topic as well as they thought they did, they can revisit it before moving on.

Additional Info

Requires:

• Computer (see Computer Requirements)

Options:

• Wound Rotor Motor Learning System (85-MT2D)
